Join Us For An ON FARM Event

**PaddockTrac** is technology developed by the University of Missouri. The tool tracks real time data on forage growth to help improve grazing management and record keeping. This easy to use technology is mounted to your atv for data collection while you monitor pastures and livestock. Data is processed through an app on your phone.

**When?**
Thursday, September 22nd, 2022
10:30am-2pm with lunch provided

**Where?**
Walter Organic Family Farms
11034 110th Street
Villard, MN 56385
